Re: **167.9 Acre Haby Tract**

MDP # 027-07

Dear Mr. Lopez,

The City Staff Development Review Committee has reviewed **167.9 Acre Haby Tract** Master Development Plan **M.D.P. # 027-07**. Please find enclosed a signed copy for your files. Your plan was approved for acceptance. However, please note the following conditions:

In consideration of public safety and convenience, excessive grades by reason of topography should be avoided in street layouts and arrangements. Any access and R.O.W. issues along state facilities will need to be resolved with the **Texas Department of Transportation (TXDOT)**. For information about these requirements you can contact TXDOT at (210) 615-5814.

Traffic Impact Analysis & Streets Division indicate that under the Unified Development Code (UDC) listed below are some of the requirements and onsite improvements that are necessary and shall be provided by the developer, on and before the completion of 167.9 Acre Haby Tract MDP, at no cost to the City of San Antonio:

- Secondary access must be secured prior to a plat or combination of plats exceeding 125 dwelling units; UDC §35-506(e)(7) or seek a variance as per UDC §35-483.

This is a general review of a conceptual plan not an in-depth review of the internal and external traffic flow, or streets and drainage plans. The internal street network shall be planned in order to provide safe and efficient movement of traffic to and from, within and past, the proposed development, while minimizing the impact to non-site trips. All technical requirements of the Unified Development Code will be complied with at the time of platting and/or permitting.

If you have any further questions, please call Nick V. Fernandez at (210) 207-0282.

Historic Preservation approves with the following conditions:

The Texas Sites Atlas indicates that no archaeological sites have been previously identified within the above referenced property. However, the project may contain sites, some of which may be significant. Thus, before any work that might affect any sites is begun we recommend that a qualified professional conduct an archaeological investigation of the property. The

investigation should be performed according to Archeological Survey Standards for Texas, and previously identified sites should be reexamined and reevaluated, if any.

If you have any further questions, please call Kay Hinds at (210) 207-7306.

Bexar County approves with the following conditions:

The following improvements must be provided by the developer prior to completion of the 167.9 Acre Haby Tract development:

- Secondary access must be secured prior to a plat or combination of plats exceeding 125 dwelling units; UDC §35-506(e)(7) or seek a variance as per UDC §35-483.
- Roadway classification of the stub-out streets is subject to change during platting based on the density of the adjacent developments.

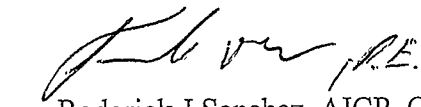

If you have any further questions, please call Todd Sang at (210) 335-6649.

All platting shall comply with the Unified Development Code (UDC), Master Plan, Major Thoroughfare Plan, and all applicable regulations of the City of San Antonio. It will be expected that all of the property depicted in your Master Development Plan to include floodplains, drainage areas, and open space shall be platted. It is suggested to work closely with the school district, so they can plan accordingly.

Please note that this action by the committee does not establish any commitment for the provision of utilities, services or zoning of any type now or in the future by the City of San Antonio. The validity for this permit shall expire within twenty-four months from the date of approval if less than eight percent of the net area of the project or less than twenty acres is subject to an approved final plat or an expenditure less than five hundred thousand dollars has been made as per UDC §35-412(h)(1).

Should you need further assistance, please contact Luz Gonzales at (210) 207-7898.

Sincerely,

Roderick J. Sanchez, AICP, CBO
